

## **Early Years Foundation Stage (EYFS) Curriculum (Ages 2 to 4 years old)**

Kindergarten/EYFS is the important foundation of your child's education so here at WIS we will ensure we build a bright future for your child from their first week in school.

We understand that everyone wants the best for their child and we believe that we have designed a campus and recruited well trained and experienced professionals that mean WIS will be the best option for your child on Koh Samui.

We have will be providing the opportunity for innovative and stimulating learning through play activities, which are key to them achieving the strong educational foundation, which will ensure success for their future educational success.

The most important role our teachers have in Kindergarten is to ensure that students feel happy and comfortable, as this is important to their learning.

We recognise that happy students quickly gain confidence and this makes building relationships with their teachers and their friends in Kindergarten much easier. It is within this caring and supportive atmosphere that learning thrives.

We encourage our student's curiosity to explore the world around them, both indoors and outdoors and our purpose-built facilities are designed to allow them to do this in a secure and safe environment.
